Professional Summary

iOS Engineer with 4+ years in software development, specialized in building production iOS apps that millions of people rely on. Strong background in fintech and banking products, crafting reliable, well-architected experiences in Swift, UIKit and SwiftUI, applying Clean Architecture and MVVM patterns. Code reviewer and mentor, comfortable owning features end to end in fast-paced, high-impact environments.

Skills

iOS: Swift, UIKit, SwiftUI, Swift Concurrency (async/await, Task, TaskGroup, structured concurrency, cooperative cancellation)

Architecture: Clean Architecture, MVVM, MVC, Modularization

Tools & Others: Swift Package Manager, Git, GitHub, JavaScript, React, HTML, CSS

Soft: Team collaboration, mentoring, problem-solving, fast learner

Languages: Spanish (Native), English (Intermediate - B1)

Experience

NTT Data / iOS Engineer

August 2024 - Present, Remote • Client: Interbank

- Shipped Phase 1 and Phase 2 of the investments module end to end — both live in production today, helping drive double-digit percentage growth in customers acquiring investment products and turning the module into a new revenue line for the bank.
- Phase 1: built from scratch the app's new investments zone, the first in-app gateway for customers to acquire mutual funds, term deposits and high-yield savings accounts, increasing traffic and product acquisition.
- Phase 2: developed the investor-profile flow with personalized product recommendations, and delivered the fully native mutual fund purchase experience, previously available only through web banking.
- Member of the core code review group: alongside a small group of engineers, review and gatekeep code quality for a 50+ iOS developer team.
- Mentored and onboarded a teammate as her technical reference, and proposed improvements adopted into the team's code styling documentation.
- Built user flows from scratch, contributed to a UIKit-to-SwiftUI migration (view layer) and to the app's Swift Package Manager component modularization.
- Coordinate daily with cross-functional teams: UX, Product Owners, Backend, Web and Android, plus QA, in an agile environment.

Freelance - Bachatours (USA) / Web Developer

September 2023 - July 2024, Remote

- Built the business website from scratch and handled its ongoing maintenance and evolution.
- Improved brand visibility and online presence, working directly with the owner to translate business requirements into technical solutions.

Baufest / Software Developer

March 2022 - August 2023, Remote

- Contributed to the development of MODO, a digital wallet for BBVA Argentina used by a large user base.
- Implemented and launched the money transfer functionality (TransferPull) end to end.
- Designed and developed two amortization systems for business lending products.
- Maintained and extended legacy systems, ensuring stability and backward compatibility under high-pressure delivery cycles with multidisciplinary teams.

Yobel SCM / Software Developer

August 2021 - March 2022, Remote

- Maintained and enhanced enterprise-level systems, implementing new UI components and improving existing features.
- Helped organize and standardize UI designs across modules, improving consistency of the product.

Education & Certifications

GitHub Copilot Certification / GitHub

Issued 2025 • Valid through 2027

Universidad Tecnológica del Perú / Systems Engineering

2019 - 2025

Baufest / Programa de Entrenamiento Intensivo

January 2022 - March 2022

Udemy / Courses

- iOS Development Masterclass 2026 — SwiftUI, SwiftData, AI
- iOS y Swift 5.7: Curso Completo Desde Cero a Profesional — Brais Moure
